

Independent Study & Mentorship Final Presentation Night

April 27th

Ananth Kothuri

Astrophysics

Under the mentorship of

Ms. Taylor Hutchison

.....
**"It's what you learn
after you know it all
that counts."**

-Harry S. Truman

My Final Product is a research paper that analyzes the influence of binary star systems on white dwarf stars and their characteristics.

Major Topics Covered:

- **Research/ Interviews**
 - **Original Work**
 - **Final Product**
-

I am a high school junior who is studying astrophysics for ISM. Not only do I enjoy learning about space, but I love exploring and going out of my comfort zone to gain new skills. Some of my other interests include playing the cello and computer science.

.....

Ms. Taylor Hutchison works at Texas A&M University. She has conducted extensive research into studying the most distant galaxies in the universe, and analyzes redshifts and spectroscopy to gain a deeper understanding of these objects.

.....

I am extremely thankful to Ms. Hutchison, as well as my entire family, for helping me to perform my best and create a Final Product that I am proud of. Their support was so helpful for me throughout the entire year.
